SUMMARY

A highly motivated tech enthusiast with a strong foundation in software engineering. Currently pursuing a Bachelor of Computer Science (Software Engineering) at Universiti Tun Hussein Onn Malaysia (UTHM) with a CGPA of 3.85. Proven experience in system development, project documentation, and server management. Skilled in working collaboratively with teams to deliver innovative solutions, streamline workflows, and contribute to impactful digital initiatives. Seeking an internship to further apply technical expertise and support project teams in driving innovation and excellence.

SKILLS

Programming Proficiency

- Experienced in PHP, PostgreSQL, JavaScript, and CSS, focusing on database optimization and dynamic system functionality. Completed 100% of module components for the F-2401 project during my internship.
- Familiar with Agile methodology, achieving a 20% reduction in project completion time and improving software quality by 25%.
- Skilled in Synology NAS server setup and configuration, enabling secure, organized, and efficient data management.

Project Management Support

- Enhanced website SEO and social media engagement, contributing to a 15% increase in traffic for the Daily Cuti journal website.
- Streamlined system documentation processes during the F-2401 project, improving team productivity by 15%.

Collaboration with Internal and External Parties

- Involvement in student committees and clubs, such as the Student Representative Council Election Committee and Information Technology Club, showcases my ability to collaborate with internal and external parties.
- Successfully attracted post-graduate students to participate in the Student Representative Council Election Committee, resulting in a 60% increase in post-graduate student involvement compared to the previous session.

WORK EXPERIENCE

Faazmiar Technology Sdn. Bhd.

Internship

Kuala Lumpur

August 2024 - January 2025

- System Development: Contributed to developing the Faz-Drill system by improving data integration workflows and making the interface easy to use. Helped build key components for data entry and reporting, enhancing the system's functionality and user experience.
- Synology NAS Server Setup: Set up and configured the Synology NAS server to provide secure and efficient data storage. Managed access permissions, data backup, and synchronization processes, improving data security and availability.
- Collaboration with Technical Teams: Worked with internal teams to solve technical challenges related to system performance and data management, helping improve backend services and optimize system performance.

- Optimization and Troubleshooting: Led efforts to fix bugs and performance issues, working with developers to find and fix problems, improving system efficiency by 20% and reducing errors during data processing and reporting.

Web Impian Sdn. Bhd.

Kelantan

Internship

February 2021 - July 2021

- Contributed to the F-2401 project, focusing on the development and enhancement of the F-2401 system, including database optimization, data integration, and improving system functionality to meet operational requirements.
- Assisted in the setup and configuration of the Synology server, establishing a secure and efficient environment for managing backend data services while collaborating with the team to implement best practices for server management, ensuring robust performance, accessibility, and reliable data storage solutions.
- Actively participated in progress update meetings and technical discussions, contributing to the refinement of project objectives and resolving challenges collaboratively.
- Developed practical skills in software development, server management, and project coordination, while ensuring a professional approach to problem-solving and teamwork..

Ice Lab Coffee

Melaka

Part-time Barista

July 2022 - August 2022

- Developed strong interpersonal skills by providing exceptional customer service in a fast-paced environment.
- Contributed to team morale and cohesion by collaborating with colleagues to ensure smooth operations during busy periods.

7 Eleven Sdn. Bhd. (Cherang Ruku Branch)

Kelantan

Part-time Retail Cashier

January 2018 - Jun 2018

- Enhanced communication skills by effectively engaging with customers and addressing inquiries or concerns promptly.
- Collaborated with team members to optimize store operations and provide excellent service during peak hours.
